## Snapshot of the TN Report Card

### Achievement: White County, Central View Elementary

The Tennessee Comprehensive Assessment Program, or TCAP, is a set of statewide assessments given in Tennessee to measure students' skills and progress. Students in grades 3-8 take the Achievement Test, and high school students take End of Course exams for various subjects. Student results are categorized as below basic, basic, proficient or advanced. Students that are proficient or advanced are commonly considered to be at or above grade level. Subjects with fewer than 10 valid tests and/or subjects with at least 99 percent or less than 1 percent of students scoring in any one proficiency category are suppressed in accordance with federal privacy laws.

### TVAAS Composites: White County, Central View Elementary

Overall	3
Literacy	3
Numeracy	3
Literacy and Numeracy	3

For the 2015-16 school year, TVAAS composites do NOT include grades 4-8, due to suspension of testing in grades 3-8. For school districts that serve only grades K-8 and do not serve high school grades, 2015-16 TVAAS scores only include data based on middle school students who took End-of-Course assessments for high school-level courses (e.g, Algebra I), and where applicable, first and second grade data based on the optional K-2 assessment.

#### What is the difference between achievement and growth data?

##### Achievement

- Measures a student's performance at one single point in time
- Is highly correlated with a student's demographics
- Compares student performance to a standard
- Is critical to a student's post-secondary opportunities

##### Growth

- Measures a student's growth across time; i.e., across years
- Is not related to a student's demographics
- Compares student performance to his/her own prior performance
- Is critical to ensuring a student's future academic success

By measuring students' academic achievement AND growth, schools and districts will have a more comprehensive picture of their own effectiveness in raising student achievement.
